Biological Process
Cellular Component
Molecular Function
glycolytic process
primary metabolic process
glucose metabolic process
carbohydrate metabolic process
macromolecule metabolic process
cellular component organization
phosphorus metabolic process
phosphate-containing compound metabolic process
positive regulation of biological process
xenobiotic metabolic process
intracellular organelle
nucleus
membrane-bounded organelle
intracellular membrane-bounded organelle
plasma membrane
membraneless organelle
intracellular membraneless organelle
cytoskeleton
phosphopyruvate hydratase complex
organelle lumen
calcium ion binding
heterocyclic compound binding
nucleotide binding
ATP binding
oxidoreductase activity, acting on the aldehyde or oxo group of donors, NAD
ADP as acceptor
NAD binding
glyceraldehyde-3-phosphate dehydrogenase (NAD+) (phosphorylating) activit
oxidoreductase activity, acting on the aldehyde or oxo group of donors
glyceraldehyde-3-phosphate dehydrogenase [NAD(P)+] (phosphorylating) acti
NADP binding
