Biological Process
carbohydrate metabolic process
carbohydrate derivative metabolic process
generation of precursor metabolites and energy
nucleobase-containing small molecule metabolic process
anatomical structure development
cell differentiation
reproductive process
protein-containing complex assembly
mitotic cell cycle
lipid metabolic process

Molecular Function
catalytic activity
oxidoreductase activity
hydrolase activity
catalytic activity, acting on a protein
transferase activity
isomerase activity
antioxidant activity
transporter activity
lyase activity
molecular function regulator activity
